ANNOUNCEMENT.

We beg to present this portfolio for your inspection. It contains views of some of the prominent buildings and residences which have been heated and ventilated by us; some from plans and specifications furnished by the architects or owners, and some from plans and specifications which we have created. Our idea in publishing this portfolio is to establish in the minds of those who may want heating and ventilating work done, that we have had experience in that line, and are capable of undertaking the largest work, feeling that we can refer to the buildings shown and those enumerated in the back of portfolio.

Our company was incorporated under the laws of the State of Pennsylvania, on July 24th, 1884, our name at that time being "The Philadelphia Exhaust Ventilator Company." We subsequently changed our name to "Onderdonk Heating and Ventilating Company," as better setting forth the character of our business.

We have had entrusted to us by architects and owners, the construction of some of the most important and finest work in this country, and can claim that we have made a success of our work, as the buildings will show. We cannot say that we have always given satisfaction, but have endeavored to make wrongs right, when we were informed of them. We employ competent experts and engineers, and are prepared to undertake the designing of systems for heating by steam or hot water—direct or indirect radiation—the plenum vacuum system of heating induced by fans, and mechanical or natural ventilation, and to act in the capacity of engineers or constructors. Those desiring working plans and specifications will receive the best attention, our prices being no higher than good engineering skill demands. We have made a determination to do the best and highest grade of work, using only the best quality of material that will be lasting and give good results while in use, and will establish a good reputation for us and our work. We are extensive workers of sheet iron, and are prepared to construct it in any shape or position, and are owners of various patents for devices in connection with our business.

Soliciting your consideration and patronage, we remain,

Yours respectfully,

ONDERDONK HEATING AND VENTILATING CO.

Philadelphia, May, 1892.
